**Indoor Motion  
Detectors**

**COOPER** Menvier

Part of Cooper Menvier, **SCANTRONIC** is a world leader in the development, manufacture and supply of intruder alarm technology.

The 335 and 340 Indoor Motion Detectors use Passive Infra Red (PIR) technology to detect body heat in the event of an intrusion.

Designed to blend in with your decor, the white outer case is extremely robust and yet aesthetically appealing giving an attractive look to the products.

Fully sealed optics provide full protection against draught, dust and insect ingress, offering a high level of environmental immunity and reducing the burden from repeated false alarms.

**SCANTRONIC** have designed the 335 and 340 to meet the most professional alarm installation standards and yet have made the products easy to install, saving installation time and causing a minimum of disruption to your decor.

Suitable for your office, your shop, or any commercial or industrial buildings, the 335 and 340 PIR detectors have been manufactured to the very highest quality standards. Utilising the same housing, they offer exceptional value for money with many features incorporated to give a high level of security benefits and total peace of mind.

	335	340
<b>COVERAGE</b>	Adjustable coverage over a 15m range at 90 degrees.	Adjustable coverage over a 15m range at 90 degrees.
<b>SIGNAL PROCESSING</b>	Dual edge - Bi-polar, designed to provide a high degree of discrimination against all signals other than an intruder.	Dual channel, Dual edge - Bi-polar, designed to provide a high degree of discrimination against all signals other than an intruder.
<b>DETECTION ZONES</b>	44 detection zones on 5 planes.	88 detection zones on 5 planes.
<b>WHITE LIGHT FILTER</b>	Advanced Poly IR <sup>®7</sup> White Light Filter to minimise false alarms caused by intense white light e.g car headlamps and sunlight.	Advanced Poly IR <sup>®7</sup> White Light Filter to minimise false alarms caused by intense white light e.g car headlamps and sunlight.
<b>SEALED OPTICS</b>	Fully sealed to provide full protection against draught, dust and insect ingress.	Fully sealed to provide full protection against draught, dust and insect ingress.
<b>RF IMMUNITY</b>	Careful circuit design, metallic shielded circuitry and use of surface mount components gives high levels of immunity from radio interference.	Careful circuit design, metallic shielded circuitry and use of surface mount components gives high levels of immunity from radio interference.
<b>LATCHING</b>	Enables a number of detectors to link to one panel zone.	Enables a number of detectors to link to one panel zone.
<b>LOOK DOWN ZONE</b>	Eliminates blind spots.	Eliminates blind spots.
<b>TEMPERATURE COMPENSATION</b>	Adjusts the sensitivity as temperatures change.	Adjusts the sensitivity as temperatures change.
<b>LOCAL &amp; REMOTE WALK TEST</b>	Input Control included.	Input Control included.
<b>PET ALLEY</b>	Auto pet alley with standard lens.	Auto pet alley with standard lens.
<b>OPTIONAL LENS KIT</b>	Alternative Fresnel lenses for long range/corridor, horizontal curtain and vertical curtain.	Alternative Fresnel lenses for long range/corridor, horizontal curtain and vertical curtain.
<b>MASKING SEGMENTS</b>	Included for selectable coverage.	Included for selectable coverage.
<b>MOUNTING</b>	Height between 1.8m to 2.4m. Corner mounted or wall mounted.	Height between 1.8m to 2.4m. Corner mounted or wall mounted.
<b>CURRENT CONSUMPTION</b>	Quiescent 10mA.	Quiescent 10mA.
<b>VOLTAGE RANGE</b>	9.5V - 15V.	9.5V - 15V.
<b>OPERATING TEMPERATURE</b>	-10° to +55°C.	-10° to +55°C.
<b>DIMENSIONS</b>	(HxWxD) = 90 x 70 x 45mm.	(HxWxD) = 90 x 70 x 45mm.
